- ! Graphic display of test progression
- ! Direct printout of a running or terminated test over separate printing unit
- ! Optional: storage and export of at least 40 protocol files
- ! Optional: Connection to IptDataLogging®

Gett into pipe testing technology

Always suitable to Ipt systems and anytime upgradable

The modular airless versions of the BlueLine series are a high performance stand-alone equipment suitable to all Ipt test tanks or ovens, to offer our customers a convenient start-up access to the professional pipe testing technology.

The basic version

Equipped with original Airless-modules, with unit offers capacity of up to 20 separate pressures. The start-up version already provides all prerequisites to accurate pipe tests.

The top version

The new touch screen and the IptCompBase® technology offers even more comfort; the integrated computer manages display and printout of the result. The add-on modules leave open all possibilities to integrate you blue-line unit into a network or to upgrade it to pro-version with IptDataLogging®.

Ipt makes your visions come true in all what is technically and economically feasible!
