STATS line

Serac has a partnership agreement with TECHNE SpA, BOLOGNA, Italy which is a specialist of aseptic blowing (for sterile bottles) and co-extrusion blow moulding (for multi-layer bottles). Both companies are now in a position to offer an integrated system named STATS (Serac Techne Aseptic System) including :

- blow- moulding
- Bottle storage
- aseptic filling-capping
- end of lines equipment with all ancillaries

*This application is related to the packaging of **UHT milk or long-life fruit juices in multi layer HDPE** (High Density Polyethylene) bottles.*

The advantages of this process are :

- proven technology (15 Serac lines in production)
- no chemical treatment of the inside of the bottles

STATS line : to provide a turn-key supply with a single technical and financial responsibility, one of the two companies leading a given project as main contractor.
